📖 Documentation Hub

Luminous Digital Projects

| Status | Active | Version | 1.0 | Updated | January 2026 |

Welcome

Welcome to the central documentation hub for all Luminous Digital projects. Each project has its own dedicated folder containing comprehensive documentation including business requirements, technical designs, and implementation guides.

🗂 Projects

Active Projects

🏠 **altpay**

Payment Gateway for Nigerian Businesses

A secure, reliable payment gateway that enables Nigerian businesses to accept card payments online. Features include card tokenization, 3D Secure authentication, webhook notifications, and next-day settlement.

Status	Timeline	Team

📋 Documentation Standards

All project documentation follows a consistent structure:

Document Type	Purpose	Filename Convention
Business Requirements	Feature specs, user stories	`business_requirements.md`
Technical Design	Architecture, APIs, database	`technical_design.md`
MVP Specification	Scope, timeline, deliverables	`mvp_specification.md`
Stakeholder Overview	Non-technical summary	`stakeholder_overview.md`
Technical Overview	Tech stack, infrastructure	`technical_overview.md`

Document Type	Purpose	Filename Convention
Index	Project documentation homepage	index.md

🏗 Folder Structure

```
docs/
├── index.md                 # This file - Main documentation hub
├── altpay/                  # altpay Payment Gateway
│   ├── index.md             # Project homepage
│   ├── business_requirements.md
│   ├── technical_design.md
│   ├── mvp_specification.md
│   ├── stakeholder_overview.md
│   └── technical_overview.md
└── [future_project]/        # Future projects follow same structure
    ├── index.md
    └── ...
```

🚀 Quick Start

1. **Browse Projects** - Click on any project card above to view its documentation
2. **Navigate** - Each project has an index page with links to all documents
3. **Search** - Use your editor's search to find specific content across all docs

📊 Project Overview

Project	Status	Stack	Team	Launch
altpay	◍ Active	Next.js + Laravel	7	Mar 2026

👥 Organization

📝 Contributing

When adding new project documentation:

1. Create a new folder with the project name (snake_case, lowercase)
2. Add an index.md as the project homepage

3. Follow the naming conventions for document types
4. Update this main index to include the new project
